ADDITIONAL INFORMATION

Related Product Information for anti-HUNK antibody	HUNK, an AMPK/SNF1 -type protein kinase, contains a domain homologous to SNF1, a protein involved in the response to nutritional stress in yeast. HUNK has been shown to participate in vesicular transport. Additionally, functional studies in mice suggest that HUNK regulates endocytosis via interaction with rabaptin-5 protein and induces changes in mammary glands during pregnancy.
Product Categories/Family for anti-HUNK antibody	Family: Protein Kinase; Subfamily: AMPK/SNF1
