ADDITIONAL INFORMATION

Related Product Information for anti-APLNR antibody	APJ or Apelin Receptor, is an angiotensin-1-like receptor that is expressed abundantly in the corpus callosum and spinal cord. The human apelin receptor has been localized to chromosome 11. In porcine spinal cord, APJ mRNA was detected at a higher level in white matter than in gray matter (Matsumoto et al., 1996). APJ binds apelin, which induces cell acidification (Tatemoto et al., 1998).
Product Categories/Family for anti-APLNR antibody	Family: GPCR; Subfamily: Apelin
