ADDITIONAL INFORMATION

Related Product Information for anti-HTR7 antibody	5-HT7 Receptor (HTR7) is a serotonin receptor with several functions, including regulation of the circadian rhythm and mediation of smooth-muscle relaxation in the vasculature and GI tract. HTR7 has been implicated in depression, autistic, and other neuropsychiatric disorders. Three protein isoforms have been documented: isoform a: 445aa; isoform b: 432aa; isoform d: 479aa.
Product Categories/Family for anti-HTR7 antibody	Family: GPCR; Subfamily: Serotonin
