ADDITIONAL INFORMATION

Related Product Information for anti-BOB antibody	G protein-coupled receptor GPR15 is an Orphan-A GPCR with an unknown ligand. Coreceptor usage of primary human immunodeficiency virus type 1 (HIV-1) isolates varies according to biological phenotype. The chemokine receptors CCR5 and CXCR4 are the major coreceptors that, together with CD4, govern HIV-1 entry into cells.
Product Categories/Family for anti-BOB antibody	Family: GPCR; Subfamily: Orphan-A
