ADDITIONAL INFORMATION

Related Product Information for anti-GLP1R antibody	GLP1R, a Glucagon Receptor, has been suggested to affect the feelings of satiety or hunger, sensation of glucose levels, control of glucagon sensitivity of islets, and non insulin-dependent diabetes mellitus. Glucagon-like peptide 1 is an incretin hormone produced by enteroendocrine L-cells in the intestinal mucosa. The hormone is released in response to food intake and plays an important role in maintaining blood glucose homeostasis.
Product Categories/Family for anti-GLP1R antibody	Family: GPCR; Subfamily: Glucagon
