

## Chicken Collagen VI (COL6) ELISA Kit | COL6 elisa kit

Chicken Collagen VI (COL6) Elisa Kit

CATALOG #  
**AAA53141**

REACTIVITY  
**Chicken**

### PRODUCT SYNONYMS

Collagen VI (COL6); Chicken Collagen VI (COL6) Elisa Kit; COL6 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                       |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Chicken                                                                                                               |
| Specificity             | No cross-reaction with other factors.                                                                                 |
| Sequence Length         | 3176                                                                                                                  |
| Samples                 | Chicken Serum, Plasma Or Cell Culture Supernatant And Organizations In The Natural And Recombinant Col3 Concentration |
| Assay Type              | Sandwich                                                                                                              |
| Detection Range         | 20 ng/ml-0.312 ng/ml                                                                                                  |
| Sensitivity             | 0.06 ng/ml.                                                                                                           |
| Intra-assay Precision   | <= 8%                                                                                                                 |
| Inter-assay Precision   | <= 12%                                                                                                                |
| Preparation and Storage | Store all reagents at 2-8 degree C.                                                                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for COL6 elisa kit

Principle of the Assay: This experiment use double-sandwich elisa technique and the ELISA Kit provided is typical. The pre-coated antibody is Chicken COL3 monoclonal antibody and the detecting antibody is polyclonal antibody with biotin labeled. Samples and biotin labeling antibody are added into ELISA plate wells and washed out with PBS or TBS. Then Avidin-peroxidase conjugates are added to ELISA wells in order; Use TMB substrate for coloring after reactant thoroughly washed out by PBS or TBS. TMB turns into blue in peroxidase catalytic and finally turns into yellow under the action of acid. The color depth and the testing factors in samples are positively correlated.
