

## Rat 2,3-dinor-TXB2 ELISA Kit | 2,3-dinor-TXB2 elisa kit

Rat 2,3-dinor-TXB2 ELISA Kit

CATALOG #  
**AAA53783**

REACTIVITY  
**Rat**

### PRODUCT SYNONYMS

2; 3-dinor-TXB2; Rat 2; 3-dinor-TXB2 ELISA Kit; 3-dinor-TXB2 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                              |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                                          |
| Specificity             | No cross-reaction with other factors.                                                                                        |
| Samples                 | Rat serum, plasma or cell culture supernatant and organizations in the natural and recombinant 2,3-dinor-TXB2 concentration. |
| Assay Type              | Sandwich (Quantitative)                                                                                                      |
| Detection Range         | 2000 pg/ml-31.2 pg/ml                                                                                                        |
| Sensitivity             | Up to 12 pg/ml.                                                                                                              |
| Intra-assay Precision   | <= 8%                                                                                                                        |
| Inter-assay Precision   | <= 12%                                                                                                                       |
| Preparation and Storage | Store all reagents at 2-8 degree C.                                                                                          |

### IMAGES

Standard Curve (Sample)

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
