

GoldHi EndoFree Plasmid Extraction Kit

GoldHi EndoFree Plasmid Midi Kit

CATALOG #
AAA55325

PRODUCT SYNONYMS

GoldHi EndoFree Plasmid; GoldHi EndoFree Plasmid Midi Kit; GoldHi EndoFree Plasmid extraction kit

ADDITIONAL INFORMATION

Related Product Information for GoldHi EndoFree Plasmid extraction kit

Background/Introduction: This kit is specially designed to efficiently and rapidly extract plasmids from 15-50 ml bacterial cells. Based on conventional alkaline lysis method, the new and unique silicon membrane binds plasmid DNA efficiently and specifically, and each column can bind up to 250 ug plasmid DNA. Meanwhile by using a special buffer system and endotoxin-removal filters, impurities such as endotoxin, genomic DNA, RNA, proteins are effectively removed. The plasmids obtained from the kit have high purity and high yield and are particularly suitable for transfection experiments. The plasmids can also be used for DNA sequencing, PCR, in vitro transcription, restriction endonuclease digestion and other experiments.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
