

## Toxoplasma gondii p30 (SAG1) Recombinant Protein

Toxoplasma gondii P30 (SAG1) Recombinant protein

|                              |                        |                                            |
|------------------------------|------------------------|--------------------------------------------|
| CATALOG #<br><b>AAA58311</b> | HOST<br><b>E. coli</b> | APPLICATIONS<br><b>Western Blot, ELISA</b> |
|------------------------------|------------------------|--------------------------------------------|

### PRODUCT SYNONYMS

Toxoplasma gondii p30 (SAG1) Recombinant Protein; Toxoplasma gondii P30 (SAG1) Recombinant protein; Toxoplasma gondii p30 (SAG1) Recombinant Protein recombinant protein

### PRODUCT SPECIFICATIONS

|                                                                                                  |                                                                                     |
|--------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| Host                                                                                             | E. coli                                                                             |
| Purity/Purification                                                                              | > 95% pure (10% PAGE, coomassie staining).<br>GS-4B Sepharose-Affinity Purification |
| Form/Format                                                                                      | Purified, Liquid; 50 mM Tris-HCl, pH 8, 1.5 M Urea containing 50% Glycerol.         |
| Concentration                                                                                    | 1 mg/mL (Bradford Method) (varies by lot)                                           |
| Applicable Applications for Toxoplasma gondii p30 (SAG1) Recombinant Protein recombinant protein | WB (Western Blot), ELISA                                                            |
| Preparation and Storage                                                                          | Upon receipt, store at -20°C. Avoid multiple freeze/thaw cycles.                    |

### ADDITIONAL INFORMATION

|                                                                                                      |                                                                                                                                                                                                                                      |
