

## Mouse Mycoplasma Pneumoniae Monoclonal Antibody

Mycoplasma Pneumoniae

|                              |                      |                                                  |
|------------------------------|----------------------|--------------------------------------------------|
| CATALOG #<br><b>AAA58480</b> | HOST<br><b>Mouse</b> | APPLICATIONS<br><b>Immunofluorescence, ELISA</b> |
|------------------------------|----------------------|--------------------------------------------------|

### PRODUCT SYNONYMS

Mycoplasma Pneumoniae; Monoclonal Antibody; P1; anti-Mycoplasma Pneumoniae antibody

### PRODUCT SPECIFICATIONS

|                                                                 |                                                                        |
|-----------------------------------------------------------------|------------------------------------------------------------------------|
| Host                                                            | Mouse                                                                  |
| Clonality                                                       | Monoclonal                                                             |
| Isotype                                                         | IgG1                                                                   |
| Specificity                                                     | Specific for the P1 adhesin of M. pneumoniae.                          |
| Purity/Purification                                             | >90%; Purified from ascites fluid                                      |
| Form/Format                                                     | 0.01 M phosphate buffered saline, pH 7.2 and contains 0.1 sodium azide |
| Concentration                                                   | 100 ug/ml (varies by lot)                                              |
| Applicable Applications for anti-Mycoplasma Pneumoniae antibody | IF (Immunofluorescence), ELISA                                         |
| Preparation and Storage                                         | 2-8°C                                                                  |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
