ADDITIONAL INFORMATION

Related Product Information for IFNg recombinant protein	IFN gamma is a potent multifunctional cytokine primarily produced by T cells and natural killer cells. IFN gamma exerts a variety of antiproliferative, immunoregulatory and pro-inflammatory biological activities in response to binding at specific cell surface receptors. Recombinant IFN gamma comprises a 143 amino acid fragment (24-166) corresponding to the mature soluble IFN gamma chain protein and is expressed in E Coli with an amino-terminal hexahistidine tag. This product is not intended for therapeutic use.
