

Mouse anti-Human ACTH Monoclonal Antibody | anti-ACTH antibody

ACTH

CATALOG # AAA58784	HOST Mouse	REACTIVITY Human
------------------------------	----------------------	----------------------------

PRODUCT SYNONYMS

ACTH; Monoclonal Antibody; anti-ACTH antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Human
Clonality	Monoclonal
Positive Control	Pituitary Gland

IMAGES

Product Format	Dilution
Predilute	Ready to Use
Concentrate	1:50-1:200

Dilution Info

IHC (Immunohistochemistry)
ACTH [AAA58784] on Pituitary Gland

ADDITIONAL INFORMATION

Related Product Information for anti-ACTH antibody

Adrenocorticotrophic Hormone (ACTH or Corticotropin) is a peptidic hormone synthesized in the anterior pituitary gland. The primary application of Anti-ACTH is in the identification of pituitary tumours and the study of pituitary disease. The Anti-ACTH antibody reacts with ACTH-producing cells (corticotrophs). It may also cause paraneoplastic syndromes by secreting ACTH from other tumours, such as some small cell carcinomas of the lung.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
