

Rabbit anti-Human BOB.1 Monoclonal Antibody | anti-BOB.1 antibody

BOB.1

CATALOG # AAA58791	HOST Rabbit	REACTIVITY Human
------------------------------	-----------------------	----------------------------

PRODUCT SYNONYMS

BOB.1; Monoclonal Antibody; anti-BOB.1 antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human
Clonality	Monoclonal
Positive Control	Tonsil

IMAGES

Product Format	Dilution
Predilute	Ready to Use
Concentrate	1:50-1:200

Dilution Info

IHC (Immunohistochemistry)
Tonsil [AAA58791] on Tonsil

ADDITIONAL INFORMATION

Related Product Information for anti-BOB.1 antibody

BOB-1 is a B-cell-specific coactivator whose expression is majorly restricted to mature B-cells, and typically in germinal center B-cells. It is co-activator for Oct-1 and Oct-2 transcription factors. BOB-1 is used for B-lineage determination of CD20- plasmablastic or diffuse large B-cell lymphoma (DLBCL). BOB-1 was also presented to be useful marker when combined together with CD79a and Cyclin E for discriminating classical Hodgkin's lymphoma from primary mediastinal large B-cell lymphoma.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
