

Rabbit anti-Human CD56 Monoclonal Antibody | anti-CD56 antibody

CD56

CATALOG # AAA58801	HOST Rabbit	REACTIVITY Human
------------------------------	-----------------------	----------------------------

PRODUCT SYNONYMS

CD56; Monoclonal Antibody; anti-CD56 antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human
Clonality	Monoclonal
Positive Control	Neuroblastoma

IMAGES

Product Format	Dilution
Predilute	Ready to Use
Concentrate	1:100-1:400

Dilution Info

IHC (Immunohistochemistry)
CD56 [AAA58801] on Neuroendocrine Tumour

ADDITIONAL INFORMATION

Related Product Information for anti-CD56 antibody

Cluster of Differentiation 56 (CD56), also known as Neural-Cell Adhesion Molecule (NCAM), is a glycoprotein involved in synaptic plasticity, cell-cell adhesion, neurite outgrowth, learning, and memory. NCAM is expressed in normal neurons, glia, natural killer cells, activated T-cells, brain and cerebellum, neuroendocrine tissues, and skeletal muscle. Anti-CD56 recognizes a number of tumours including myeloma, myeloid leukemia, natural killer/T-cell lymphomas, neuroendocrine tumours, pancreatic acinar-cell carcinoma, pheochromocytoma, and Wilm's tumour. CD56 is detectable in neoplasms that are neuroectodermally-derived, such as retinoblastoma, medulloblastomas, astrocytomas, small cell carcinomas, and neuroblastomas. It has also been linked to rhabdomyosarcoma, a tumour that is mesodermally-derived.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
