### PRODUCT SYNONYMS

DOG1; Monoclonal Antibody; anti-DOG1 antibody

### PRODUCT SPECIFICATIONS

|                  |                                |
|------------------|--------------------------------|
| Host             | Rabbit                         |
| Reactivity       | Human                          |
| Clonality        | Monoclonal                     |
| Isotype          | IgG                            |
| Positive Control | Gastrointestinal Stromal Tumor |

### IMAGES

| Product Format | Dilution     |
|----------------|--------------|
| Predilute      | Ready to Use |
| Concentrate    | 1:50-1:200   |

Dilution Info

IHC (Immunohistochemistry)  
DOG1 [AAA58805] on Gist

### ADDITIONAL INFORMATION

|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Related Product Information for anti-DOG1 antibody | DOG1, also known as Discovered on GIST-1, is a marker that is highly specific for gastrointestinal stromal tumour (GIST). Anti-DOG1 is extremely sensitive for the detection of GIST and its identification. Although some GIST stain weakly for c-kit, DOG1 is expressed in the vast majority of GIST cases. Reports have also indicated DOG1 as a marker for salivary acinar and intercalated duct differentiation. |
