

Rabbit anti-Human Helicobacter Pylori Monoclonal Antibody

Helicobacter Pylori

CATALOG # AAA58806	HOST Rabbit	REACTIVITY Human
------------------------------	-----------------------	----------------------------

PRODUCT SYNONYMS

Helicobacter Pylori; Monoclonal Antibody; anti-Helicobacter Pylori antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG
Positive Control	H. pylori infected stomach tissue

IMAGES

Product Format	Dilution
Predilute	Ready to Use
Concentrate	1:50-1:200

Dilution Info

IHC (Immunohistochemistry)

ADDITIONAL INFORMATION

Related Product Information for anti-Helicobacter Pylori antibody

Helicobacter pylori are spiral-shaped, gram-negative bacteria that inhabit the mucosal lining of the gastric epithelium. Infection with H. pylori is strongly associated with many gastroduodenal diseases, including intestinal-type carcinomas, peptic and gastric ulcers, and chronic gastritis. There is evidence linking these bacteria to gastric and mucosa-associated lymphoid tissue lymphomas, and H. pylori has also been indicated as a risk factor for colorectal polyps in children.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
