

Rabbit anti-Human PAX-8 Monoclonal Antibody | anti-PAX-8 antibody

PAX-8

CATALOG # AAA58813	HOST Rabbit	REACTIVITY Human
------------------------------	-----------------------	----------------------------

PRODUCT SYNONYMS

PAX-8; Monoclonal Antibody; anti-PAX-8 antibody

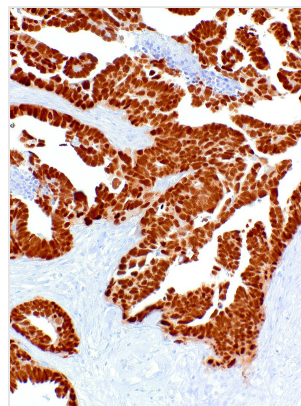

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG
Positive Control	Ovarian Carcinoma (Non-Mucinous Carcinoma), Thyroid Carcinoma, Renal Cell Carcinoma

IMAGES

Product Format	Dilution
Predilute	Ready to Use
Concentrate	1:50-1:200

Dilution Info

IHC (Immunohistochemistry)
PAX-8 [AAA58813] on Ovarian Cancer

ADDITIONAL INFORMATION

Related Product Information for anti-PAX-8 antibody

PAX-8 is expressed in simple ovarian inclusion cysts and non-ciliated mucosal cells of the fallopian tubes, but is absent from normal ovarian surface epithelial cells. Mutations in the PAX-8 gene are linked to thyroid follicular carcinomas, atypical thyroid adenomas, and thyroid dysgenesis. Reports have associated PAX-8 expression with renal carcinoma, nephroblastoma, and seminoma, and have indicated PAX-8 as a useful marker for renal epithelial tumours, ovarian cancer, and for differential identifies in lung and neck tumours. Anti-PAX-8 can be useful in determining the primary site of invasive micropapillary carcinomas of ovary from bladder, lung, and breast, when used in adjunct with a panel of organ-specific markers such as uroplakin, mammaglobin, and TTF-1.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
