ADDITIONAL INFORMATION

Related Product Information for anti-D-3 Dopamine receptor IgG fraction antibody	The antiserum was raised in a rabbit which was immunized with ~-Endorphin covalently attached onto a carrier protein. The antiserum is specific for this peptide and is suitable for immunocytochemical detection of ~-Endorphin. The antiserum has been characterized by, RIA ELISA techniques. Dilute the lyophilized antiserum with 0.1 ml of 10 mg/ml BSA in PBS for the equivalent of whole antiserum, or with additional buffer for more dilute antiserum.
