

Rabbit IGF-1 (Human) Polyclonal Antibody

IGF-1 (Human)

CATALOG # AAA58830	HOST Rabbit	APPLICATIONS Immunoprecipitation
------------------------------	-----------------------	--

PRODUCT SYNONYMS

IGF-1 (Human); Polyclonal Antibody; anti-IGF-1 (Human) antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Clonality	Polyclonal
Specificity	Antiserum Specificity: Polypeptide = % Cross Reactivity Insulin-like growth factor 1 (human)= 100 IGF-2 (human) = <0.1 IGF-2(rat) = <0.1 Insulin (human) = 0 EGF = 0 TGF alpha = 0
Sequence Length	71
Applicable Applications for anti-IGF-1 (Human) antibody	IP (Immunoprecipitation)

ADDITIONAL INFORMATION

Related Product Information for anti-IGF-1 (Human) antibody	These pooled antisera were raised in a rabbit which was immunized with synthetic human insulin-like growth factor 1 [Ac60-70] covalently attached onto a carrier protein. These pooled antisera are specific for the whole hIGF-1 molecule as well as the peptide analog and have been shown to immunoprecipitate human IGF-1. Dilute the lyophilized antiserum with 0.1ml of 10mg/ml BSA in PBS for the equivalent of whole antiserum, or with additional buffer for more dilute antiserum.
Product Categories/Family for anti-IGF-1 (Human) antibody	Immunoprecipitating Antibodies

NCBI AND UNIPROT INFORMATION

NCBI GI #	1247519
NCBI Official Full Name	IGF-1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
