

Mouse anti-All species VSV-G Tag Antibody | anti-VSV-G antibody

VSV-G tag antibody

CATALOG #	HOST	REACTIVITY	APPLICATIONS
AAA58840	Mouse	All species	Immunofluorescence, Immunoprecipitation, Western Blot

PRODUCT SYNONYMS

VSV-G Tag; VSV-G tag antibody; Monoclonal Anti-VSV-G Tag; anti-VSV-G antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	All species
Isotype	IgG1
Form/Format	Liquid (1mg/ml)
Applicable Applications for anti-VSV-G antibody	IF (Immunofluorescence), IP (Immunoprecipitation), WB (Western Blot)
Immunogen	A synthetic peptide YTDIEMNRLGK conjugated to KLH.
Storage Buffer	In PBS (pH7.4), 50% Glycerol and 0.02% Sodium Azide
Preparation and Storage	Store at 2-8°C for 1 month. Or aliquot and store at -20°C or below for long term. Avoid repeated freeze and thaw cycles

ADDITIONAL INFORMATION

Related Product Information for anti-VSV-G antibody	Vesicular stomatitis Indiana virus (VSIV) (often still referred to as VSV) is a virus in the family Rhabdoviridae; the well-known rabies virus belongs to the same family. VSIV can infect insects, cattle, horses and pigs. It has particular importance to farmers in certain regions of the world where it can infect cattle. This is because its clinical presentation is identical to the very important foot and mouth disease virus. It is also a common laboratory virus used to study the properties of viruses in the family Rhabdoviridae, as well as to study viral evolution.

NCBI AND UNIPROT INFORMATION

NCBI GI #	15072764
NCBI Official Full Name	VSV-G protein

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
