

Apolipoprotein A, Apo A Native Protein

Apolipoprotein A, Apo A Protein (Active)

CATALOG # AAA59058	HOST Human serum	APPLICATIONS ELISA
------------------------------	----------------------------	------------------------------

PRODUCT SYNONYMS

Apolipoprotein A; Apo A; Apo A Protein (Active); Apo A native protein

PRODUCT SPECIFICATIONS

Host	Human serum
Purity/Purification	>90% by SDS-PAGE
Form/Format	Liquid; 10mM PBS (pH 7.4).
Applicable Applications for Apolipoprotein A, Apo A native protein	ELISA
Preparation and Storage	Aliquot and store at -20 degree C or -80 degree C for long term. Avoid repeated freeze and thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for Apolipoprotein A, Apo A native protein	Background: Apolipoproteins are proteins that bind lipids (oil-soluble substances such as fat and cholesterol) to form lipoproteins. They transport the lipids through the lymphatic and circulatory systems. They transport the lipids through the lymphatic and circulatory systems. Apoprotein A is one of exchangeable apolipoproteins which have the same genomic structure and are members of a multi-gene family that probably evolved from a common ancestral gene. ApoA1 and ApoA4 are part of the APOA1/C3/A4/A5 gene cluster on chromosome 11. They are consist of alpha-helices and associate with lipid droplets reversibly.
---	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
