

Rabbit anti-Human FSH Monoclonal Antibody | anti-FSH antibody

FSH, RMaB (EP257)

CATALOG # AAA59339	HOST Rabbit	REACTIVITY Human
------------------------------	-----------------------	----------------------------

PRODUCT SYNONYMS

FSH; Monoclonal Antibody; RMaB (EP257); FSHalpha; anti-fsh; anti fsh; FSH alpha; FSHa; FSH a; FSHB; follicle stimulating hormone beta polypeptide; HH24; anti-FSH antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG
Clone Number	EP257
Form/Format	Paraffin, Frozen FSH is a rabbit monoclonal antibody derived from cell culture supernatant that is concentrated, dialyzed, filter sterilized and diluted in buffer pH7.5, containing BSA and sodium azide as a preservative.
Immunogen	A synthetic peptide corresponding to residues of human FSH (beta subunit) protein.
Control	Pituitary
Localization	Cytoplasmic
Preparation and Storage	Store at 2-8 degree C (Control Slides: Store at 20-25 degree C)

IMAGES

IHC (Immunohistochemistry)

FSH Antibody Immunohistochemistry on an FFPE Pituitary Adenoma Tissue

Antibody Type	Dilution	Volume/QT
Prediluted	Ready-To-Use	3.0 ml
Prediluted	Ready-To-Use	7.0 ml
Prediluted	Ready-To-Use	15.0 ml
Concentrated	1:50-1:200	0.1 ml
Concentrated	1:50-1:200	0.5 ml
Concentrated	1:50-1:200	1.0 ml
Control Slides		5

Dilution Info

ADDITIONAL INFORMATION

Related Product Information for anti-FSH antibody	Follicle stimulating hormone (FSH) is a hormone synthesized and secreted by gonadotropes in the anterior pituitary gland. In the ovary, FSH stimulates the growth of immature Graa follicles to maturation. As the follicle grows, it releases inhibin, which deactivates the FSH production. In men, FSH enhances the production of androgen-binding protein by the Sertoli cells of the testis and is critical for spermatogenesis. FSH and LH act synergistically in reproduction. FSH antibody is a useful marker in the classification of pituitary tumors and the study of pituitary disease. It reacts with FSH-producing cells.
