

Mouse anti-Human MSH2 Monoclonal Antibody | anti-MSH2 antibody

MSH2 (BSB-147)

CATALOG # AAA59366	HOST Mouse	REACTIVITY Human
------------------------------	----------------------	----------------------------

PRODUCT SYNONYMS

MSH2; Monoclonal Antibody; MSH2 (BSB-147); COCA1; DNA mismatch repair protein Msh2; FCC1; hMSH2; HNPCC; HNPCC1; homolog 2 colon cancer nonpolyposis type 1 E coli; MutS protein homolog 2; msh-2; anti-msh2; anti-msh-2; anti msh2; anti msh-2; anti msh 2; anti-MSH2 antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG1
Clone Number	BSB-147
Form/Format	Paraffin, Frozen MSH2 antibody is a mouse monoclonal antibody for immunohistochemistry derived from cell culture supernatant that is concentrated, dialyzed, filter sterilized and diluted in buffer pH7.5, containing BSA and sodium azide as a preservativ
Immunogen	Recombinant Human MSH2 Protein.
Control	Colon, Skin, Breast, Tonsil, Fallopian Tube, Colon Carcinoma
Localization	Nuclear
Preparation and Storage	Store at 2-8 degree C (Control Slides: Store at 20-25 degree C)

IMAGES

MSH2 Antibody Immunohistochemistry on a FFPE Colon Carcinoma Tissue

Antibody Type	Dilution	Volume/Qty
Prediluted	Ready-To-Use	3.0 ml
Prediluted	Ready-To-Use	7.0 ml
Prediluted	Ready-To-Use	15.0 ml
Concentrated	1:100-1:500	0.1 ml
Concentrated	1:100-1:500	0.5 ml
Concentrated	1:100-1:500	1.0 ml
Control Slides		5

Dilution Info

ADDITIONAL INFORMATION

Related Product Information for anti-MSH2 antibody	MSH2 is a mouse monoclonal antibody for immunohistochemistry from Bio SB. MSH2 is a mismatch repair gene commonly associated with Hereditary Non-Polyposis Colorectal Cancer (HNPCC). This gene was identified as a locus frequently mutated in HNPCC. When cloned, it is a human homolog of the E. coli DNA mismatch repair gene mutS, consistent with the characteristic alterations in microsatellite sequences (RER+ phenotype) found in HNPCC. MSH2 antibody expression is abnormally deficient in a high proportion of patients with microsatellite instability (MSI-H). This finding is associated with the autosomal dominant condition found in Hereditary Non-Polyposis Colon Cancer. This MSH2 antibody (along with MLH1 antibody) is useful in screening patients and families for this rare condition. Colon cancers that are microsatellite unstable have a better prognosis than their microsatellite stable counterparts.
