

## Goat CML (Carboxymethyl-lysine) Antibody | anti-CML antibody

Goat anti-CML (Carboxymethyl-lysine) Affinity Pure

|                              |                     |                                                        |
|------------------------------|---------------------|--------------------------------------------------------|
| CATALOG #<br><b>AAA60427</b> | HOST<br><b>Goat</b> | APPLICATIONS<br><b>Immunoblot, Western Blot, ELISA</b> |
|------------------------------|---------------------|--------------------------------------------------------|

### PRODUCT SYNONYMS

CML (Carboxymethyl-lysine); Goat anti-CML (Carboxymethyl-lysine) Affinity Pure; Goat Anti-N epsilon-(carboxymethyl) lysine (CML); Polyclonal Antibody; Affinity Purified; anti-CML antibody

### PRODUCT SPECIFICATIONS

|                                               |                                                                                                                                                                                                                                                            |
|-----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Host                                          | Goat                                                                                                                                                                                                                                                       |
| Specificity                                   | Specifically binds to CML modified proteins. Dilution for immunoblot and ELISA range: 200 to 20,000. (A slight amount of precipitation may have occurred during storage due to the natural properties of these antibodies; please centrifuge before use.). |
| Concentration                                 | 1mg / ml (OD. 1.35/280 nm). (varies by lot)                                                                                                                                                                                                                |
| Applicable Applications for anti-CML antibody | IB (Immunoblot), ELISA                                                                                                                                                                                                                                     |
| Source Note                                   | Polyclonal antibody against CML-KLH purified by CML- Portein Sepharose affinity column.                                                                                                                                                                    |
| Preservative                                  | In 75 mM PBS, 75 mM NaCl, 0.5 mM EDTA, 0.02% NaN <sub>3</sub> , pH 7.2.                                                                                                                                                                                    |
| Use                                           | The antibody can be used for detection of Carboxymethyl-lysine in plasma, lipoproteins, and other CML containing proteins, immunoassays, immunoblots, enzyme conjugation, or biotinylation.                                                                |
| Preparation and Storage                       | -20 degree C for long-term storage, 2-8 degree C for short-term storage. Aliquot to avoid repeated thaw and freeze.                                                                                                                                        |
