

Human ACE2 ELISA Kit | ACE2 elisa kit

Human ACE2 ELISA Assay

CATALOG #
AAA60723

REACTIVITY
Human

PRODUCT SYNONYMS

ACE2; Human ACE2 ELISA Assay; ACE2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Preparation and Storage	Store at +4 degree C

ADDITIONAL INFORMATION

Related Product Information for ACE2 elisa kit

Principle of the Assay: Microtitration wells coated with murine anti-ACE2 capture antibody are exposed to test specimens, which may contain ACE2 reactive determinants. The ACE2 antigen in the specimen is specifically captured onto the immobilized antibody during specimen incubation. The captured antigen is then reacted with a biotinylated mouse monoclonal ACE2 detection antibody. Subsequently, Streptavidin-HRP conjugate is then added. Following a wash cycle, specifically bound enzyme conjugate is detected by reaction with the Substrate Solution, tetramethylbenzidine (TMB). The assay is measured spectrophotometrically to indicate the level of ACE2 reactive determinants present in a sample. The assay can be used to quantify human ACE2 in cell culture media, cell culture lysate, plasma or serum.
