### PRODUCT SYNONYMS

Goat Random Ab; Polyclonal Antibody; Goat Random Polyclonal Antibody; anti-Goat Random Ab; Random goat IgG; anti-Goat Random Ab antibody

### PRODUCT SPECIFICATIONS

|                                                          |                                                                                                                                                                                      |
|----------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Host                                                     | Goat                                                                                                                                                                                 |
| Reactivity                                               | It does not react against any human protein.                                                                                                                                         |
| Clonality                                                | Polyclonal                                                                                                                                                                           |
| Isotype                                                  | IgG                                                                                                                                                                                  |
| Specificity                                              | Recognizes the immunogen by Western blot.                                                                                                                                            |
| Form/Format                                              | Polyclonal antibody supplied as (3 mg/ml) aliquot in PBS, 20% glycerol and 0.05% sodium azide. This antibody is epitope-affinity purified from goat antiserum.                       |
| Sequence                                                 | ALRRTARNPR SCGRRHRGRW RRCADPCTHR DRRSDRRERR PERRHQDRAA RDGRAAAPDR HERWRRSERR GGGSCSRQGQ LRLQRSNGRV                                                                                   |
| Applicable Applications for anti-Goat Random Ab antibody | WB (Western Blot)                                                                                                                                                                    |
| Immunogen                                                | Purified random recombinant protein fragment (ALRRTARNPRSCGRRHRGRWRRCADPCTHRDRRSDRRERRPERRHQDRAARDGRAAAPDRHERWRRSERRGGGSCSRQGQLRLQRSNGRV) produced in E. coli.                       |
| Antigen                                                  | Purified recombinant peptide produced in E. coli.                                                                                                                                    |
| Handling                                                 | The antibody solution should be gently mixed before use.                                                                                                                             |
| Preparation and Storage                                  | For continuous use, store at 2-8 deg:C for one-two days. For extended storage, store in -20 deg:C freezer. Working dilution samples should be discarded if not used within 12 hours. |

ADDITIONAL INFORMATION

Related Product Information for anti-Goat Random Ab antibody

Random peptide without homology to any known protein

Goat polyclonal antibody to Random recombinant protein fragment. This Random recombinant protein fragment does not have any homology to known protein sequence. This antibody can be used in biochemical and cell biology experiments as a negative control.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
