ADDITIONAL INFORMATION

Related Product Information for anti-ERP57 antibody	PDIA3 protein disulfide isomerase family A, member 3 Goat polyclonal to ERp57 - endoplasmic reticulum lumen marker. This endoplasmic reticulum protein interacts with lectin chaperones calreticulin and calnexin to modulate folding of newly synthesized glycoproteins. It has disulfide isomerase activity and complexes of lectins and this protein mediate protein folding by promoting formation of disulfide bonds in their glycoprotein substrates.
