ADDITIONAL INFORMATION

Related Product Information for anti-mNectarine antibody

Goat polyclonal antibody to mNectarine (Nectarine fluorescent protein). mNectarine is a basic (constitutively fluorescent), monomeric engineered derivate of red fluorescent protein (RFP) isolated from members of the Discosoma (mushroom coral) family. mNectarine is a ~27kDa protein that is optimally excited at a 558nm and has a maximum of emission at 578nm. It is used in research as a reporter to label and study the biology of the cell using a wide range of applications.
