ADDITIONAL INFORMATION

Related Product Information for anti-CFP antibody

Goat polyclonal antibody to CFP (Cyan fluorescent protein). CFP is a basic (constitutively fluorescent), monomeric engineered derivative of green fluorescent protein (GFP) isolated from the jellyfish *Aequorea victoria*. CFP is a ~27kDa protein that is optimally excited at a 456nm and has a maximum of emission at 480nm. It is used in research as a reporter to label and study the biology of the cell using a wide range of applications.
