

## Rat Tyrosine Hydroxylase (TH) ELISA Kit | TH elisa kit

Rat Tyrosine Hydroxylase (TH) ELISA Kit

CATALOG #  
**AAA63358**

REACTIVITY  
**Rat**

### PRODUCT SYNONYMS

Tyrosine Hydroxylase (TH); Rat Tyrosine Hydroxylase (TH) ELISA Kit; TYH; DYT5b; Tyrosine 3-Monooxygenase; Dystonia 14; TH elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                            |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                                                                                                                        |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of TH. No significant cross-reactivity or interference between TH and analogues was observed.                                      |
| Sequence Length         | 498                                                                                                                                                                                                        |
| Samples                 | Rat tissue homogenates, cell lysates or other biological fluids                                                                                                                                            |
| Assay Type              | Quantitative Sandwich                                                                                                                                                                                      |
| Detection Range         | 0.156-10ng/mL                                                                                                                                                                                              |
| Sensitivity             | < 0.059ng/mL                                                                                                                                                                                               |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level TH were tested 20 times on one plate, respectively. Intra-Assay: CV<10%                                       |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level TH were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%     |
| Preparation and Storage | For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C. |

ADDITIONAL INFORMATION

|                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for TH elisa kit | <p>Intended Uses: The kit is a sandwich enzyme immunoassay for the in vitro quantitative measurement of TH in rat tissue homogenates, cell lysates or other biological fluids.</p> <p>Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to TH. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to TH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain TH, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of TH in the samples is then determined by comparing the O.D. of the samples to the standard curve.</p> |
