

Human Syncoilin (SYNC) ELISA Kit | SYNC elisa kit

Human Syncoilin (SYNC) ELISA Kit

CATALOG #
AAA63468

REACTIVITY
Human

PRODUCT SYNONYMS

Syncoilin (SYNC); Human Syncoilin (SYNC) ELISA Kit; Protein S100-A5; Protein S-100D; S100D; SYNC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of SYNC. No significant cross-reactivity or interference between SYNC and analogues was observed.
Sequence Length	476
Samples	Tissue homogenates, cell lysates and other biological fluids.
Assay Type	Sandwich
Detection Range	0.312-20ng/mL
Sensitivity	0.112ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level SYNC were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level SYNC were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for SYNC elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of SYNC in human tissue homogenates, cell lysates and other biological fluids. Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to SYNC. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to SYNC. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain SYNC, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of SYNC in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	239787821
NCBI GeneID	81493
NCBI Accession #	NP_001155180.1
NCBI GenBank Nucleotide #	NM_001161708.1
UniProt Accession #	Q9H7C4; B4DNK8; B4DY58; C9IY41
Molecular Weight	54,947 Da
NCBI Official Full Name	syncoilin isoform 2
NCBI Official Synonym Full Names	syncoilin, intermediate filament protein
NCBI Official Symbol	SYNC
NCBI Official Synonym Symbols	SYNC1; SYNCOILIN
NCBI Protein Information	syncoilin
UniProt Protein Name	Syncoilin
UniProt Gene Name	SYNC
UniProt Synonym Gene Names	SYNC1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
