

Human Beta-Endorphin (bEP) ELISA Kit | bEP elisa kit

Human Beta-Endorphin (bEP) ELISA Kit

CATALOG #
AAA63852

REACTIVITY
Human

PRODUCT SYNONYMS

Beta-Endorphin (bEP); Human Beta-Endorphin (bEP) ELISA Kit; b-EP; bEP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of BEP. No significant cross-reactivity or interference between BEP and analogues was observed.
Sequence Length	31
Samples	Serum, plasma, cerebrospinal fluid and other biological fluids.
Assay Type	Competitive inhibition
Detection Range	15.625-1000pg/mL
Sensitivity	4.22pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level BEP were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level BEP were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for bEP elisa kit	Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of bEP in serum, plasma, cerebrospinal fluid and other biological fluids. and other biological fluids. Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to BEP has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled BEP and unlabeled BEP (Standards or samples) with the pre-coated antibody specific to BEP. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of BEP in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of BEP in the sample.

NCBI AND UNIPROT INFORMATION

NCBI GI #	119332
NCBI Official Full Name	Beta-endorphin

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
