

Human Dystrobrevin Beta (DTNb) ELISA Kit | DTNb elisa kit

Human Dystrobrevin Beta (DTNb) ELISA Kit

CATALOG #
AAA64086

REACTIVITY
Human

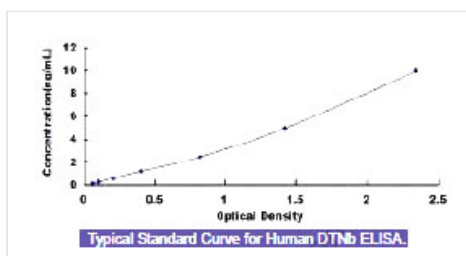

PRODUCT SYNONYMS

Dystrobrevin Beta (DTNb); Human Dystrobrevin Beta (DTNb) ELISA Kit; DTNb elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of DTNb. No significant cross-reactivity or interference between DTNb and analogues was observed.
Sequence Length	620
Samples	Tissue homogenates and other biological fluids.
Assay Type	Sandwich
Detection Range	0.156-10ng/mL
Sensitivity	0.055ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level DTNb were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level DTNb were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for DTNb elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of DTNb in human tissue homogenates and other biological fluids. Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to DTNb. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to DTNb. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain DTNb, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of DTNb in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	372626414
NCBI GeneID	1838
NCBI Accession #	NP_001243232.1
NCBI GenBank Nucleotide #	NM_001256303.1
UniProt Accession #	O60941; O43782; O60881; O75538; Q86VR4; Q96AW0; Q9UE14; Q9UE15; Q9UE16; B7Z733; F5GZG4; G5E9F6
Molecular Weight	69,294 Da
NCBI Official Full Name	dystrobrevin beta isoform 6
NCBI Official Synonym Full Names	dystrobrevin beta
NCBI Official Symbol	DTNB
NCBI Protein Information	dystrobrevin beta
UniProt Protein Name	Dystrobrevin beta
UniProt Gene Name	DTNB
UniProt Synonym Gene Names	DTN-B

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
