

## Rat Tumor Necrosis Factor Receptor Superfamily, Member 1B (TNFRSF1B) ELISA Kit | TNFRSF1B elisa kit

Rat Tumor Necrosis Factor Receptor Superfamily, Member 1B (TNFRSF1B) ELISA Kit

CATALOG #

**AAA64168**

REACTIVITY

**Rat**

### PRODUCT SYNONYMS

Tumor Necrosis Factor Receptor Superfamily; Member 1B (TNFRSF1B); Rat Tumor Necrosis Factor Receptor Superfamily; Member 1B (TNFRSF1B) ELISA Kit; CD120B; P75; TBPII; TNF-R-II; TNF-R75; TNFBR; TNFR2; TNFR80; P75tnfr; Tumor necrosis factor receptor 2; p80 TNF-alpha receptor; Etanercept; TNFRSF1B elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                              |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                                                                                                                          |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of TNFRSF1B. No significant cross-reactivity or interference between TNFRSF1B and analogues was observed.                            |
| Sequence Length         | 474                                                                                                                                                                                                          |
| Samples                 | Serum, plasma, tissue homogenates, cell lysates and other biological fluids.                                                                                                                                 |
| Assay Type              | Sandwich                                                                                                                                                                                                     |
| Detection Range         | 0.156-10ng/mL                                                                                                                                                                                                |
| Sensitivity             | 0.056ng/mL                                                                                                                                                                                                   |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level TNFRSF1B were tested 20 times on one plate, respectively. Intra-Assay: CV<10%                                   |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level TNFRSF1B were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12% |
| Preparation and Storage | For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.   |

ADDITIONAL INFORMATION

|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for TNFRSF1B elisa kit | <p>Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of TNFRSF1B in rat serum, plasma, tissue homogenates, cell lysates and other biological fluids.</p> <p>Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to TNFRSF1B. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to TNFRSF1B. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain TNFRSF1B, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of TNFRSF1B in the samples is then determined by comparing the O.D. of the samples to the standard curve.</p> |
