

Mouse Activity Regulated Cytoskeleton Associated Protein (ARC) ELISA Kit | ARC elisa kit

Mouse Activity Regulated Cytoskeleton Associated Protein (ARC) ELISA Kit

CATALOG #
AAA65350

REACTIVITY
Mouse

PRODUCT SYNONYMS

Activity Regulated Cytoskeleton Associated Protein (ARC); Mouse Activity Regulated Cytoskeleton Associated Protein (ARC) ELISA Kit; Arg3.1; Activity-regulated gene 3.1 protein homolog; ARC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of ARC. No significant cross-reactivity or interference between ARC and analogues was observed.
Sequence Length	396
Assay Type	Quantitative Sandwich
Samples	Mouse tissue homogenates, cell lysates or other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.058ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level ARC were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level ARC were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for ARC elisa kit	Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to ARC. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to ARC. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain ARC, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of ARC in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for the in vitro quantitative measurement of ARC in mouse tissue homogenates, cell lysates or other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	451958117
NCBI GeneID	11838
NCBI Accession #	NP_001263613.1
NCBI GenBank Nucleotide #	NM_001276684.1
UniProt Accession #	Q9WV31; Q9ES15
Molecular Weight	45,321 Da
NCBI Official Full Name	activity-regulated cytoskeleton-associated protein
NCBI Official Synonym Full Names	activity regulated cytoskeletal-associated protein
NCBI Official Symbol	Arc
NCBI Official Synonym Symbols	mArc; Arc3.1; C86064; arg3.1
NCBI Protein Information	activity-regulated cytoskeleton-associated protein
UniProt Protein Name	Activity-regulated cytoskeleton-associated protein
UniProt Gene Name	Arc
UniProt Synonym Gene Names	mArc; Arg3.1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
