

Rabbit Cholesteryl Ester Transfer Protein (CETP) ELISA Kit | CETP elisa kit

Rabbit Cholesteryl Ester Transfer Protein (CETP) ELISA Kit

CATALOG #
AAA66544

REACTIVITY
Rabbit

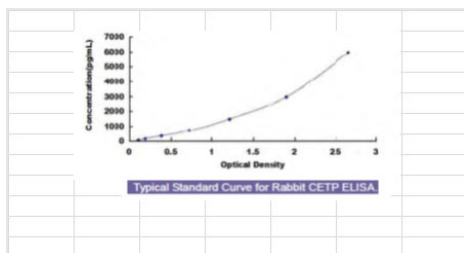

PRODUCT SYNONYMS

Cholesteryl Ester Transfer Protein (CETP); Rabbit Cholesteryl Ester Transfer Protein (CETP) ELISA Kit; LTP; Lipid Transfer Protein; Plasma Lipid Transfer Protein; Cholesterylester Transfer Protein; CETP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Specificity	This assay has high sensitivity and excellent specificity for detection of CETP. No significant cross-reactivity or interference between CETP and analogues was observed.
Sequence Length	497
Samples	Serum, plasma and other biological fluids.
Assay Type	Sandwich
Detection Range	93.75-6000pg/mL
Sensitivity	42.61pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level CETP were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level CETP were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for CETP elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of CETP in rabbit serum, plasma and other biological fluids. Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to CETP. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to CETP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain CETP, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of CETP in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	116121
NCBI GeneID	100327267
UniProt Accession #	P22687
Molecular Weight	54,514 Da
NCBI Official Full Name	Cholesteryl ester transfer protein
NCBI Official Symbol	CETP
NCBI Protein Information	cholesteryl ester transfer protein; Lipid transfer protein I; cholesteryl ester transfer protein, plasma
UniProt Protein Name	Cholesteryl ester transfer protein
UniProt Gene Name	CETP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
