

## Bovine Osteocalcin (OC) ELISA Kit | OC elisa kit

Bovine Osteocalcin (OC) ELISA Kit

CATALOG #  
**AAA67199**

REACTIVITY  
**Bovine**

### PRODUCT SYNONYMS

Osteocalcin (OC); Bovine Osteocalcin (OC) ELISA Kit; CMH1; ICE-LAP3; MCH3; Caspase 7 Apoptosis-Related Cysteine Peptidase; Cysteine Aspartate Protease 7;; OC elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                            |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Bovine                                                                                                                                                                                                     |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of OC. No significant cross-reactivity or interference between OC and analogues was observed.                                      |
| Sequence Length         | 100                                                                                                                                                                                                        |
| Assay Type              | Quantitative Sandwich                                                                                                                                                                                      |
| Samples                 | Bovine serum, plasma, tissue homogenates or other biological fluids                                                                                                                                        |
| Detection Range         | 0.312-20ng/mL                                                                                                                                                                                              |
| Sensitivity             | < 0.117ng/mL                                                                                                                                                                                               |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level OC were tested 20 times on one plate, respectively. Intra-Assay: CV<10%                                       |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level OC were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%     |
| Preparation and Storage | For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C. |

ADDITIONAL INFORMATION

|                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for OC elisa kit | <p>Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to OC. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to OC. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain OC, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of OC in the samples is then determined by comparing the O.D. of the samples to the standard curve.</p> <p>Intended Uses: The kit is a sandwich enzyme immunoassay for the in vitro quantitative measurement of OC in bovine serum, plasma, tissue homogenates or other biological fluids.</p> |
