

Human Eomesodermin (EOMES) ELISA Kit | EOMES elisa kit

Human Eomesodermin (EOMES) ELISA Kit

CATALOG #
AAA67451

REACTIVITY
Human

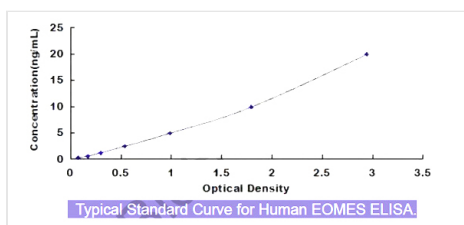

PRODUCT SYNONYMS

Eomesodermin (EOMES); Human Eomesodermin (EOMES) ELISA Kit; EOMES elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of EOMES. No significant cross-reactivity or interference between EOMES and analogues was observed.
Sequence Length	705
Assay Type	Quantitative Sandwich
Samples	Human tissue homogenates or other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	< 0.115ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level EOMES were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level EOMES were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for EOMES elisa kit	Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to EOMES. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to EOMES. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain EOMES, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of EOMES in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for the in vitro quantitative measurement of EOMES in human tissue homogenates or other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	499591691
NCBI GeneID	8320
NCBI Accession #	NP_001265111.1
NCBI GenBank Nucleotide #	NM_001278182.1
UniProt Accession #	O95936; Q8TAZ2; Q9UPM7; B7Z4I2; B7ZA51; G3XAI5
Molecular Weight	74,852 Da
NCBI Official Full Name	eomesodermin homolog isoform 1
NCBI Official Synonym Full Names	eomesodermin
NCBI Official Symbol	EOMES
NCBI Official Synonym Symbols	TBR2
NCBI Protein Information	eomesodermin homolog
UniProt Protein Name	Eomesodermin homolog
UniProt Gene Name	EOMES
UniProt Synonym Gene Names	TBR2; T-brain-2; TBR-2

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
