

## Human Cutaneous T-Cell Attracting Chemokine (CTACK) ELISA Kit | CTACK elisa kit

Human Cutaneous T-Cell Attracting Chemokine (CTACK) ELISA Kit

CATALOG #  
**AAA67714**

REACTIVITY  
**Human**

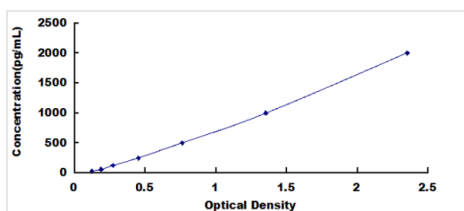

### PRODUCT SYNONYMS

Cutaneous T-Cell Attracting Chemokine (CTACK); Human Cutaneous T-Cell Attracting Chemokine (CTACK) ELISA Kit; CCL27; ILC; SCYA27; ALP; Skinkine; ESKine; PESKY; CTAK; Chemokine(C-C-Motif)ligand 27; Small Inducible Cytokine Subfamily A Member 27; IL-11 R-alpha-locus chemokine; CTACK elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                            |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                                      |
| Sequence Length         | 112                                                                                                                                                                                                        |
| Samples                 | Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids.                                                                                                      |
| Assay Type              | Sandwich                                                                                                                                                                                                   |
| Detection Range         | 31.25-2000pg/mL                                                                                                                                                                                            |
| Sensitivity             | 10.2pg/mL                                                                                                                                                                                                  |
| Intra Assay             | CV<10%                                                                                                                                                                                                     |
| Inter Assay             | CV<12%                                                                                                                                                                                                     |
| Preparation and Storage | For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C. |
