

## Mouse Adiponectin Receptor 1 (ADIPOR1) ELISA Kit | ADIPOR1 elisa kit

Mouse Adiponectin Receptor 1 (ADIPOR1) ELISA Kit

CATALOG #  
**AAA67900**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Adiponectin Receptor 1 (ADIPOR1); Mouse Adiponectin Receptor 1 (ADIPOR1) ELISA Kit; ACDCR1; CGI45; PAQR1; TESBP1A; TESBP1-A; Progestin and AdipoQ Receptor Family Member I; ADIPOR1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                             |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                                                                       |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of ADIPOR1. No significant cross-reactivity or interference between ADIPOR1 and analogues was observed.                             |
| Sequence Length         | 375                                                                                                                                                                                                         |
| Samples                 | Serum, plasma and other biological fluids.                                                                                                                                                                  |
| Assay Type              | Sandwich                                                                                                                                                                                                    |
| Detection Range         | 3.125-200ng/mL                                                                                                                                                                                              |
| Sensitivity             | 1.17ng/mL                                                                                                                                                                                                   |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level ADIPOR1 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%                                   |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level ADIPOR1 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12% |
| Preparation and Storage | For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.  |

ADDITIONAL INFORMATION

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for ADIPOR1 elisa kit | <p>Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of ADIPOR1 in mouse serum, plasma, and other biological fluids.</p> <p>Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to ADIPOR1. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to ADIPOR1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain ADIPOR1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of ADIPOR1 in the samples is then determined by comparing the O.D. of the samples to the standard curve.</p> |
