

Mouse Cocaine And Amphetamine Regulated Transcript (CART) ELISA Kit | CART elisa kit

Mouse Cocaine And Amphetamine Regulated Transcript (CART) ELISA Kit

CATALOG #
AAA68154

REACTIVITY
Mouse

PRODUCT SYNONYMS

Cocaine And Amphetamine Regulated Transcript (CART); Mouse Cocaine And Amphetamine Regulated Transcript (CART) ELISA Kit; CART elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of CART. No significant cross-reactivity or interference between CART and analogues was observed.
Sequence Length	116
Samples	Tissue homogenates, cell lysates and other biological fluids.
Assay Type	Sandwich
Detection Range	0.156-10ng/mL
Sensitivity	0.055ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level CART were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level CART were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for CART elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of CART in mouse tissue homogenates, cell lysates and other biological fluids. Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to CART. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to CART. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain CART, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of CART in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	139948472
NCBI GeneID	27220
NCBI Accession #	NP_038760.3
NCBI GenBank Nucleotide #	NM_013732.7
UniProt Accession #	P56388; Q9QXZ8
Molecular Weight	12,809 Da
NCBI Official Full Name	cocaine- and amphetamine-regulated transcript protein isoform 1 preproprotein
NCBI Official Synonym Full Names	CART prepropeptide
NCBI Official Symbol	Cartpt
NCBI Official Synonym Symbols	Cart
NCBI Protein Information	cocaine- and amphetamine-regulated transcript protein
UniProt Protein Name	Cocaine- and amphetamine-regulated transcript protein
UniProt Gene Name	Cartpt
UniProt Synonym Gene Names	Cart

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
