

## Human Neurochondrin (NCDN) ELISA Kit | NCDN elisa kit

Human Neurochondrin (NCDN) ELISA Kit

CATALOG #  
**AAA68612**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Neurochondrin (NCDN); Human Neurochondrin (NCDN) ELISA Kit; Norbin; NCDN elisa kit

### PRODUCT SPECIFICATIONS

|                       |                                                                                                                                                                                                          |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity            | Human                                                                                                                                                                                                    |
| Specificity           | This assay has high sensitivity and excellent specificity for detection of NCDN. No significant cross-reactivity or interference between NCDN and analogues was observed.                                |
| Sequence Length       | 729                                                                                                                                                                                                      |
| Samples               | Tissue homogenates or other biological fluids                                                                                                                                                            |
| Assay Type            | Quantitative Sandwich                                                                                                                                                                                    |
| Detection Range       | 0.156-10ng/mL                                                                                                                                                                                            |
| Sensitivity           | <0.061ng/mL.                                                                                                                                                                                             |
| Intra-assay Precision | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level NCDN were tested 20 times on one plate, respectively. Intra-Assay: CV<10%                                   |
| Inter-assay Precision | Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level NCDN were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12% |

### ADDITIONAL INFORMATION

#### Related Product Information for NCDN elisa kit

**Intended Uses:** The kit is a sandwich enzyme immunoassay for the in vitro quantitative measurement of NCDN in human tissue homogenates or other biological fluids.

**Principle of the Assay:** The microtiter plate provided in this kit has been pre-coated with an antibody specific to NCDN. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to NCDN. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain NCDN, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of NCDN in the samples is then determined by comparing the O.D. of the samples to the standard curve.
