

# Rat Amyloid Beta Precursor Protein Binding Protein 2 (APPBP2) RTU ELISA Kit | APPBP2 rtu elisa kit

Rat Amyloid Beta Precursor Protein Binding Protein 2 (APPBP2) ELISA Kit

|                              |                          |
|------------------------------|--------------------------|
| CATALOG #<br><b>AAA69176</b> | REACTIVITY<br><b>Rat</b> |
|------------------------------|--------------------------|

## PRODUCT SYNONYMS

Amyloid Beta Precursor Protein Binding Protein 2 (APPBP2); Rat Amyloid Beta Precursor Protein Binding Protein 2 (APPBP2) ELISA Kit; PAT1; Protein Interacting With APP Tail 1; Cytoplasmic Tail; Amyloid protein-binding protein 2; Protein interacting with APP tail 1; APPBP2 rtu elisa kit

## PRODUCT SPECIFICATIONS

|                           |                                                                                                                                                                                                                                                                                                                                                     |

| Reactivity                | Rat                                                                                                                                                                                                                                                                                                                                                 |
| Sequence Length           | 585                                                                                                                                                                                                                                                                                                                                                 |
| Assay Type                | Sandwich                                                                                                                                                                                                                                                                                                                                            |
| Samples                   | Tissue Homogenates or Other Biological Fluids.                                                                                                                                                                                                                                                                                                      |
| Detection Range           | 0.156-10ng/mL                                                                                                                                                                                                                                                                                                                                       |
| Sensitivity               | 0.065ng/mL                                                                                                                                                                                                                                                                                                                                          |
| RTU ELISA Kit's Advantage | The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.                                                                                                                                                            |
| Preparation and Storage   | For unopened kits: All the reagents should be kept at 4 degree C upon receipt.<br>For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal. |

| Related Product Information for<br><b>APPBP2 rtu elisa kit</b> | <p>Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to APPBP2. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to APPBP2. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain APPBP2, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm <math>\pm</math> 10nm. The concentration of APPBP2 in the samples is then determined by comparing the O.D. of the samples to the standard curve.</p> |
