

Rat Cocaine And Amphetamine Regulated Transcript (CART) RTU ELISA Kit | CART rtu elisa kit

Rat Cocaine And Amphetamine Regulated Transcript (CART) ELISA Kit

CATALOG #
AAA69533

REACTIVITY
Rat

PRODUCT SYNONYMS

Cocaine And Amphetamine Regulated Transcript (CART); Rat Cocaine And Amphetamine Regulated Transcript (CART) ELISA Kit; CARTPT; CART rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Sequence Length	129
Assay Type	Sandwich
Samples	Serum, Plasma, Tissue Homogenates or Other Biological Fluids.
Detection Range	15.6-1000pg/mL
Sensitivity	5.8pg/mL
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for CART rtu elisa kit

Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to CART. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to CART. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain CART, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of CART in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	8393049
NCBI GeneID	29131
NCBI Accession #	NP_058806.1
NCBI GenBank Nucleotide #	NM_017110.1
UniProt Accession #	P49192
Molecular Weight	12,696 Da
NCBI Official Full Name	cocaine- and amphetamine-regulated transcript protein
NCBI Official Synonym Full Names	CART prepropeptide
NCBI Official Symbol	Cartpt
NCBI Official Synonym Symbols	Cart
NCBI Protein Information	cocaine- and amphetamine-regulated transcript protein
UniProt Protein Name	Cocaine- and amphetamine-regulated transcript protein
UniProt Gene Name	Cartpt
UniProt Synonym Gene Names	Cart

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
