

Human Dexamethasone Induced Protein (DEXI) RTU ELISA Kit | DEXI rtu elisa kit

Human Dexamethasone Induced Protein (DEXI) ELISA Kit

CATALOG #
AAA70210

REACTIVITY
Human

PRODUCT SYNONYMS

Dexamethasone Induced Protein (DEXI); Human Dexamethasone Induced Protein (DEXI) ELISA Kit; MYLE; Dexamethasone Induced Transcript; DEXI rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	95
Assay Type	Sandwich
Samples	Tissue Homogenates, Cell Lysates or Other Biological Fluids.
Detection Range	0.156-10ng/mL
Sensitivity	0.052ng/mL
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for DEXI rtu elisa kit

Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to DEXI. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to DEXI. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain DEXI, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of DEXI in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #

[14719431](#)

NCBI GeneID	28955
NCBI Accession #	NP_054734.2
NCBI GenBank Nucleotide #	NM_014015.3
UniProt Accession #	O95424; B2RAA7
Molecular Weight	10,429 Da
NCBI Official Full Name	dexamethasone-induced protein
NCBI Official Synonym Full Names	Dexi homolog
NCBI Official Symbol	DEXI
NCBI Official Synonym Symbols	MYLE
NCBI Protein Information	dexamethasone-induced protein
UniProt Protein Name	Dexamethasone-induced protein
UniProt Gene Name	DEXI
UniProt Synonym Gene Names	MYLE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
