

## Human Delta Like 1 Homolog (dLK1) RTU ELISA Kit | dLK1 rtu elisa kit

Human Delta Like 1 Homolog (dLK1) ELISA Kit

CATALOG #  
**AAA70245**

REACTIVITY  
**Human**

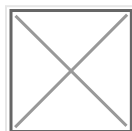

### PRODUCT SYNONYMS

Delta Like 1 Homolog (dLK1); Human Delta Like 1 Homolog (dLK1) ELISA Kit; FA1; PREF1; Pref-1; ZOG; pG2; Protein delta homolog 1; Fetal antigen 1; dLK1 rtu elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                                                                                                                                                                               |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of dLK1. No significant cross-reactivity or interference between dLK1 and analogues was observed.                                                                                                                                                                           |
| Sequence Length         | 310                                                                                                                                                                                                                                                                                                                                                 |
| Assay Type              | Quantitative Sandwich                                                                                                                                                                                                                                                                                                                               |
| Samples                 | Human serum, plasma, tissue homogenates, cell lysates or other biological fluids                                                                                                                                                                                                                                                                    |
| Detection Range         | 0.625-40ng/mL                                                                                                                                                                                                                                                                                                                                       |
| Sensitivity             | < 0.216ng/mL                                                                                                                                                                                                                                                                                                                                        |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level dLK1 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%                                                                                                                                                                              |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level dLK1 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%                                                                                                                                            |
| Preparation and Storage | For unopened kits: All the reagents should be kept at 4 degree C upon receipt.<br>For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal. |

ADDITIONAL INFORMATION

|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|----------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for dLK1 rtu elisa kit | <p>Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to dLK1. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to dLK1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain dLK1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of dLK1 in the samples is then determined by comparing the O.D. of the samples to the standard curve.</p> <p>Intended Uses: The kit is a sandwich enzyme immunoassay for the in vitro quantitative measurement of dLK1 in human serum, plasma, tissue homogenates, cell lysates or other biological fluids.</p> |
