PRODUCT SPECIFICATIONS

Host	Human recombinant protein expressed in E Coli.
Specificity	Specific Activity: 61 U/mg using spectrophotometric determination of 1-chloro- 2,4-dinitrobenzene (CDNB) conjugation with reduced glutathione (1 mM) in 100 mM NaPO ₄ (pH 6.5) at room temperature.
Purity/Purification	95% as assessed by inspection on a Coomassie Blue-stained SDS-PAGE gel.
Concentration	1.0 mg/mL total protein using the Bradford protein assay with BSA as a standard. (varies by lot)
Sequence Length	222
Storage Buffer	1.0 mg/mL total protein using the Bradford protein assay with BSA as a standard.
Procedural Notes	This purified product exhibits high enzymatic activity for CDNB, the synthetic substrate that is most commonly used for GST analyses. However, as is widely known for GST activity analysis using CDNB as a substrate, low concentrations (high dilutions) of the enzyme result in lower activity values. In contrast, initial velocities are much higher for more concentrated levels of enzyme but the rate decreases rapidly. Therefore, activity toward CDNB and these considerations provide guidance when assaying this product under low concentrations or when using substrates other than CDNB.
Preparation and Storage	At -20 degree C; AVOID MULTIPLE FREEZE-THAW CYCLES.
