IF (Immunofluorescence)
Immunofluorescence staining of fixed mouse splenocytes with anti- CD226 antibody 10E5 (AAA72125) Immunofluorescence analysis of paraformaldehyde fixed mouse splenocytes on Shi-fix coverslips stained with the chimeric rabbit IgG version of 10E5 () at 10ug/ml for 1h followed by Alexa Fluor 488 secondary antibody (2ug/ml), showing membrane staining. The nuclear stain is DAPI (blue). Panels show from left-right, top-bottom , DAPI, merged channels and an isotype control. The isotype control was an unknown specificity antibody followed by staining with Alexa Fluor 488 secondary antibody.

WB (Western Blot)
Western Blot using anti-CD266 antibody 10E5 (AAA72125) Mouse spleen tissue lysates (35ug protein in RIPA buffer) were resolved on a SDS PAGE gel and blots were probed with the chimeric rabbit version of 10E5 () at 2ug/ml before detection using an anti-rabbit secondary antibody. A primary incubation of 1h was used and protein was detected by chemiluminescence.

ADDITIONAL INFORMATION

Related Product Information for anti-CD226 antibody	Recombinant monoclonal antibody to CD226. Recombinant Platform with variable regions (i.e. specificity) from the hybridoma 10E5. This antibody was raised by immunising Lewis and Lou/M rats with the murine Th1 cell clone AE7 and Th1 cell lines derived from 5B6 and DO11.10 TCR transgenic mice, before screening for reactivity with Th1 clones and a lack of reactivity to Th2/Th0 cell lines.
Product Categories/Family for anti-CD226 antibody	T cells; NK cells
