

TCR beta Recombinant Antibody | TCRbeta recombinant antibody

Anti-TCR beta [IARC307], Human IgM, kappa

CATALOG # AAA72501	HOST Human	REACTIVITY human	APPLICATIONS Immunofluorescence, Flow Cytometry, Functional Assay, ELISA
------------------------------	----------------------	----------------------------	--

PRODUCT SYNONYMS

TCR beta; Monoclonal Recombinant Antibody; Anti-TCR beta [IARC307]; Human IgM; kappa; IARC-307; TCR-beta; T cell receptor; T-cell receptor; T cell receptor beta chain; TCRB; TRB; TCB1; Ti; TCR V beta; IARC/307; IARC 307; TCRbeta recombinant antibody

PRODUCT SPECIFICATIONS

Host	Human
Reactivity	human
Clonality	Monoclonal
Isotype	Human IgM kappa
Clone Number	IARC307
Specificity	This antibody is specific for Vbeta8.1 CDR1 sequence CKPISGHNSLFQWYRQT.
Purity/Purification	Affinity Purified using a recombinant lectin column
Form/Format	PBS with 0.02% Proclin 300.
Concentration	1mg/ml (varies by lot)
Applicable Applications for TCRbeta recombinant antibody	IF (Immunofluorescence), FCM/FACS (Flow Cytometry), ELISA
Preparation and Storage	Store at 4 degree C for up to 3 months. For longer storage, aliquot and store at -20 degree C.

IMAGES

IF (Immunofluorescence)

Immunofluorescence staining of Jurkat cells with anti-TCRbeta (AAA72501) IARC307. Immunofluorescence analysis of paraformaldehyde fixed Jurkat cells on Shifox coverslips stained with the chimeric rabbit IgG version of IARC307 (AAA72501) at 10 ug/ml for 1h followed by AlexaFluor488 secondary antibody (2ug/ml), showing membranous staining. The nucleus is stained DAPI (blue). Panels (left to right, top to bottom) AAA72501, DAPI, merged channels and an isotype control. The isotype control was an unknown specificity antibody followed by staining with AlexaFluor488 secondary antibody.

IF (Immunofluorescence)

Immunofluorescence staining of Jurkat cells with anti-TCRbeta (AAA72501) / IARC307. Immunofluorescence analysis of paraformaldehyde fixed Jurkat cells on Shifco coverslips stained with the chimeric rabbit IgG version of IARC307 (AAA72501) at 10 µg/ml for 1 h followed by Alexa Fluor 488 secondary antibody (2 µg/ml), showing membranous staining. The nucleus is stained DAPI (blue). Panels (top to bottom) AAA72501, DAPI, merged channels and an isotype control. The isotype control was an unknown specificity antibody followed by staining with Alexa Fluor 488 secondary antibody.

ADDITIONAL INFORMATION

Related Product Information for TCRbeta recombinant antibody	Derived from normal B cells in peripheral blood of a Burkitt's lymphoma patient. Screened more than 60 culture supernatants from lymphoblastoid cell lines of normal origin, Epstein-Barr virus (EBV)-carrying Burkitt lymphomas, EBV-negative Burkitt lymphomas and EBV-converted sublines of original EBV-negative Burkitt lymphoma human B-cell lines for their capacity to bind the synthetic peptide autoantigens. One lymphoblastoid B-cell line was identified, IARC307, that produces IgM kappa antibodies which specifically react with the CDR1 peptide corresponding to human Vbeta8.1 gene sequence.

NCBI AND UNIPROT INFORMATION

NCBI GI #	294862488
UniProt Accession #	P01850; A0A5B9
Molecular Weight	21.9 kDa
NCBI Official Full Name	T-cell receptor beta-1 chain C region
UniProt Protein Name	T-cell receptor beta-1 chain C region
UniProt Gene Name	TRBC1
UniProt Entry Name	TRBC1_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
