

Human Angiotensinogen ELISA Kit

Angiotensinogen (Intact)

CATALOG #
AAA72719

REACTIVITY
Human

PRODUCT SYNONYMS

Angiotensinogen; Angiotensinogen (Intact); Human Angiotensinogen (Intact); Angiotensinogen elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	Specifically detect Human Intact Angiotensinogen. Angiotensinogen taken apart doesn't detect it in renin.
Assay Type	Sandwich
Detection Range	0.28 ? 18 ng/mL
Sensitivity	0.093 ng/mL
Preparation and Storage	Store at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for Angiotensinogen elisa kit

Background: This product is for research use only and is not intended for test use.

Principle of the Assay: This kit is a solid phase sandwich ELISA (Enzyme-linked Immunosorbent Assay). As a primary antibody is coated on a plate, samples and standard are added into the wells for 1st reaction. After the reaction, HRP-conjugated secondary antibody is added into the wells for 2nd reaction. After washing away unbound the secondary antibody, Tetra Methyl Benzidine (TMB) is added to the wells and color develops.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
